### **Detailed Office Action**

#### ***Status of the Claims***

Acknowledgement is hereby made of receipt and entry of the communication filed 05 September, 2007. Newly submitted claims 7 and 8 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the claims are directed toward a method of treating HIV infection by administering the currently claimed product. The claims are independent and distinct from the invention currently being examined because the method can be practiced with a materially different product (i.e., protease inhibitors, reverse transcriptase inhibitors, etc.). Moreover, the product as claimed can be employed in a materially different process such as the generation of immunological reagents (i.e., antibodies). Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 7 and 8 are withdrawn from further consideration as being directed towards a nonelected invention (refer to 37 C.F.R. § 1.142(b) and M.P.E.P. § 821.03). This application contains claims 4-8 drawn to an invention nonelected with traverse. Claims 1 and 2 are currently under examination.

#### ***Claim Objections***

Claim 2 stands objected to because of the following informality: the phrase "The suspension of claim 1 in said suspension further reduces the HIV-1 viral burden in HIV-1 infected subjects." should read -The suspension of claim 1

wherein said suspension further reduces the HIV-1 viral burden in HIV-1-infected subjects-. Appropriate correction is required.

**35 U.S.C. § 112, First Paragraph**

The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

*Enablement*

The previous rejection of claim 3 under 35 U.S.C. § 112, first paragraph, as failing to comply with the enablement requirement, is moot in view of applicant's amendment.

**Allowable Subject Matter**

Claim 1 appears to be free of the prior art and is allowable.

**Final Rejection**

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See M.P.E.P. § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 C.F.R. § 1.136(a). A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the

advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 C.F.R. § 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
